

The Strand Single Family Community

To: Strand Single Family Homeowners

From: The Board of Directors

Irrigation Water: Irrigation clocks at all homes have been set for the proper watering times each week. **Homeowners are not allowed to reset the clocks on their own,** as we have an allocation which if exceeded may result in a fine to the Association or possibly loss of use. If you feel you need to be considered for additional watering please contact Leo Jr. Landscaping by filling out the landscape request form that can be found on line on our website. You can however, always use your own water.

MULCH: Going forward, if you would like a change in last year's color you must notify the property manager no later than August 1, 2017(no exceptions will be made). The colors available are **Red, Coco Brown, Black, Cypress Blend, and Pine Straw.** Change requests should also be made using the on-line landscape request form on our website.

WHITE FLY: This is a reminder that white fly treatment is still the responsibility of each individual homeowner. If white fly treatment is not done it is possible that an infestation will cause great harm to your plants/trees and will likely infect your neighbor's landscape. It would be a safeguard to have Leo Jr. or a licensed landscape company of your choice inspect your yard to determine if treatment is necessary.

Thank You,
Board of Directors
